Experience

AI Engineer

Dornica

Sari, Iran · On-Site

May 2025 - May 2026

- Designed and shipped production multi-agent AI systems (LangGraph) with autonomous reasoning and tool orchestration, plus Agentic RAG pipelines for document Q&A at scale.
- Built evaluation and observability tooling for LLM/agentic systems, quality scoring (Ragas), guardrails, cost/latency tracking via LangSmith and Grafana.
- Developed real-time multimodal AI applications (LiveKit) combining speech, vision and LLMs, including fine-tuned ASR models for multi-dialect transcription.
- Deployed scalable inference services and REST APIs (FastAPI, Docker) to production alongside DevOps.

AI Engineer

Freelancer

Iran · Remote

Nov 2023 - Mar 2025

- Delivered AI and deep learning projects for clients across computer vision, GANs, Transformers and image processing.
- Built retrieval-based LLM applications using vector databases and embeddings.
- Served as research assistant on a long-term AI research project, contributing to literature review, experimentation, model development and scientific writing.
- Worked hands-on with modern AI frameworks including Hugging Face and LangChain to build early LLM-based applications

AI Engineer

Parse Co.

Gorgan, Iran · Hybrid

Jan 2021 - Sep 2023

- Developed and optimized deep learning models for Computer Vision applications using PyTorch and TensorFlow.
- Performed data preprocessing, analysis, and visualization to support AI model development and evaluation.
- Applied computer vision and image processing techniques using OpenCV and modern deep learning frameworks.
- Progressed from an internship to a part-time AI engineering role, gaining hands-on experience in machine learning, deep learning, and data science workflows.

Education

BSc. Computer Engineering

2018 - 2023

Golestan University

- Final project: Lung cancer detection from CT scans using Convolutional Neural Networks (CNNs).
- Served as a Teaching Assistant, assisting with programming, algorithms, and academic activities.

Summary

AI Engineer with 5+ years of experience building and deploying production AI systems in Python.

Specializes in agentic AI and Large Language Model (LLM) applications - multi-agent workflows, Retrieval-Augmented Generation (RAG), and real-time speech and multimodal systems - and owns them end-to-end, from design through evaluation, REST API deployment, and containerization. Background combines hands-on delivery with AI research, including computer vision and deep learning. Works in English across multidisciplinary product, engineering, and research teams.
